

Gender report Somalia

GENDER DEVELOPMENT IN SOMALI

Somali small country in the horn of the Africa with population of ten million. The country has been lack of powerful functioning government since 1991 the overthrown of the military regime Siad Bare. The country under went civil wars and lawlessness that has been going for two decades.

Somali community is religion and culturally oriented people who are mostly nomadic firmly practicing ancient ideas and cultures they inherited from their ancestors that are both bad and good. They use traditional rule and practices in their social, group, community and families concerns.

Gender development in Somalia work very little for the combination of more. Long lasted traditional and customs which are common in Somali today. There is really great problems ahead in fort of the gender working groups in Somalia that need to be abolished.

Poor attitudes and false stereotype exist wide in the community. Most people in the country have no good idea about the gender equality this is some thing which is really delaying the campaigns of the gender working groups in Somalia

There are some organization local and international NGOs doing this work in Somalia for the establishment of the gender balance and equality in Somalia. These organizations do focus mainly awareness of gender rights in Somalia. The number of people benefited these are awareness are very small number who some of them have no power in the society to transmit the gender issue to the whole society step by step.

The number of project implemented for the gender development in Somalia are limited programs tailored mainly to be benefited by old women in the community. Most of the work shops and training done in Somali is covering the right of the women in the society at from adult to old people.

GENDER ISSUE IN THE YOUNG GENERATION

Gender in the young reality hundred percentage young girl in Somalia have any form of gender issue idea or opinion. Reality seventy prestige of the young people in Africa is said to be females. Ninety percentage of the young females are illiterate with our school in courtiers like Somalia so this shows that building gender development in Somali is really too late.

CHILDHOOD EDUCATION

Childhood education for the young girls in primary education I s really very important. Becase education is the sole tool that one can see or understand what is going in the averment he/she lives. An illiterate person is a person in dark big room that he/she is unable to see where about the door or window. But education is tool like torch that you may light in the dar room, so you may meet with moment of problem or worry to see where about the door or window

CAPACITY BUILDING FOR YOUNG GIRLS

Capacity building for young girls is an important thing that gender issue may be high and active in the society. Injecting the young girls with what is gender is really very useful that will sound loudly . or big light that can be seen what is in the area in fare place.

Implementing this project gender issue in the childhood seem a thing with out much consideration in the world today. Obviously, the world is busy only the capacity building for adult people mainly the women. And the support of the organizations for women which organization led and own by adult or old women.

ORGANIZATION OF THE YOUNG GIRLS

Establishment of the young girls organization is better step that deserve to be encourage and supported because it is some thing conducive to the dander development goal. Although there are barriers and obstacles prevent to

thrive such this organization in Somalia. GAAR has been suffering problems in the society. Like this organization campaigning the young girls to speak up public for their right is some thing strange in Somalia.

There are several problems GAAR met since the inception 2002. these problems include lose of property, human, injury, torture and intimidation. All these are problems prepared or aimed the abolishment of the organization and it is work in Somalia.

RECOMMENDATION

We recommend to the all it may concern (all gender working groups) to support organization of the young girls that is led and established by young girls dedicated the gender development goal from the childhood. Through free education for child girls and capacity building adult girls to be powerful potential to the gender advocacy.

QUARTER REPORT

In Somalia there are countless abuses against the young girls in Somalia. They are both violence family/public, rape, wound, dead and torture that happen in Somali the last four month are the following list.

Killings 43 cases
Wounds 124 cases
Rape 79 case
Torture: 213
Force marriage 17 cases

CONCLUSION

This year was one of the hardest years in Somali for the young girls. The number of the victims we contacted are more than we booked. Because there are several problems hindering from victim innocent young girls to present their problems public to the human rights organizations. Even the little number of victims you inter view will no disclose their problems and names for several reasons mainly security problems and public discrimination among the society.
